📅 11.2018 – 12.2019 | **DevOps Engineer Volunteer** | 📍 CHISINAU (MOLDOVA)

I have efficiently managed to combine my studies and my job(remote working). Set up and managed 10 servers. The main duties were configuration, monitoring and create multi-platform servers from workstation to manage and configure nodes. I was involved in writing ansible scripts to automatically update system components.
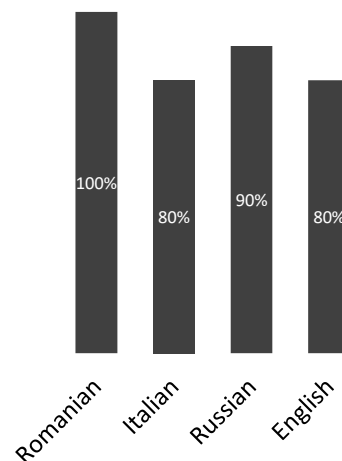

📅 07.2017 – 09.2018 | **Web Developer Volunteer** | 📍 GLASGOW (SCOTLAND)

Worked as a software developer volunteer for Won Connect CIC based in Glasgow. Main responsibilities: researching, designing, implementing and maintain web pages. The technology and programming languages used: WordPress, IntelliJ IDEA, PHP, HTML, Bootstrap.

- Experience in developing CI/CD pipelines
  - Linux Systems Administration
  - Containerization
  - Version Control
  - Database Administration
  - Database Management
  - Load Balancing Virtualization
  - Cloud Technology Management
  - Cloud Computing
  - Server Maintenance
  - Infrastructure Monitoring
- Maintained Git workflows for version control(Source Code Management)
- Developed and maintained automated CI/CD pipelines for code deployment using Jenkins
- Provisioned Servers and deployed features using Ansible
- Build and deployed Docker containers
- Orchestrated Docker container cluster using Kubernetes
- Proficient with various development , testing and deployment tools
  - Git
  - Jenkins
  - Docker
  - Kubernetes
  - Ansible
- Good understanding of DevOps key concepts
